

# Load cell analog signal amplifier

## Features

Excitation 12V/24V

Output 4-20mA, 0-3.3V, 0-5V, 0-10V

Accuracy 0.2%F.S.

Waterproof cover

Easy connection

Potentionmeter adjustment

## DESCRIPTION

The external transmitter adopts aluminum alloy shell to accurately amplify the mv signal of the load cell, and the internal line is neat. Convert mechanical quantity into standard current and voltage output, 4-20mA, 0-5V, 0-10V. The transmitter has zero and gain adjustment functions.

## DIMENSIONS (mm)
